Copilot for Microsoft 365 System

Bing

Copilot

Get answers to complex questions

For example, you could ask "Help me plan for my fishing trip."

Take actions on your PC

Control your Windows environment with actions like "Adjust my settings so I can focus."

Work across documents

Summarize and compose text from any app - start by copying text to clipboard.

Let's learn together. Windows copilot is powered by AI, so surprises and mistakes are possible. Make sure to check the facts, and [share feedback](#) so we can learn and improve!

Search

Microsoft 365 Copilot

works alongside you in the apps you use every day

Unleash creativity

Harness the power of AI so you never have to start from scratch

Unlock productivity

Let AI summarize actions for you and optimize your time

Uplevel skills

Be better at what you're good at and master what you've yet to learn

How to prepare for Microsoft 365 Copilot

Technical requirements and recommendations

- ✓ Microsoft 365 E3 or E5 are licensing prerequisites.
- ✓ AAD - based account is required¹.
- ✓ Several features require users to have a OneDrive account.
- ✓ Copilot in Word, Excel, and PowerPoint: first available in the web versions at <https://microsoft365.com> and later expand to desktop
- ✓ For Outlook: Users need to be using the new Outlook for Windows (which is publicly called “the new Outlook for Windows” and it is currently in Preview. Users can load the new Outlook by toggling or Outlook Mobile. [Getting started with the new Outlook for Windows – Microsoft Support](#).
- ✓ For Teams: Users need to be using Teams desktop client or the web app. Both current and the new versions of Teams supported.
- ✓ For Loop: Tenants must have Loop enabled. [Learn more how to enable Loop](#). *(only required if customer want to use Copilot in Loop)*
- ✓ The richness of the cross-app experience will depend on the data sources indexed by Microsoft 365. Tenants with the richest data in Microsoft 365 (Exchange, OneDrive, SharePoint, Teams) will get the best results.

Some Copilot experiences require a websocket connection from the device where the Microsoft 365 app is running to a Microsoft service.

How to prepare for Microsoft 365 Copilot

- ① Understand file permissions:
 - Overview of [sharing and permissions available in SharePoint in Microsoft 365](#)
 - [Sensitivity labels](#) from Microsoft Purview
- ② Implement data loss prevention policies:
 - Learn about [data loss prevention](#)
 - Watch: [automatically classifying and protecting documents and data](#) and [data loss prevention in Microsoft Purview](#)
- ③ Use reporting to stay updated:
 - [Usage reports](#) in the Microsoft 365 admin center
 - [Data access governance reports](#) in SharePoint admin center

Review this [blog post](#) on getting tenant ready for Microsoft 365 Copilot or watch this Microsoft Mechanics [video](#).

Copilot in Word

Copilot writes, edits, summarizes, and creates right alongside you.

Some example prompts you can ask **Copilot**:

- Draft a two-page project proposal based on the data from [*document*] and [*spreadsheet*].
- Make the third paragraph more concise. Change the tone of the document to be more casual.
- Create a one-page draft based on this rough outline.

Create content with Copilot

A job description for...

10 ideas for...

A press release for...

A project proposal about...

Describe what you'd like to create, and Copilot will generate a draft

Unleash creativity | Unlock productivity | Uplevel skills

Copilot in Excel

Copilot works alongside you to help analyze and explore your data.

Some example prompts you can ask **Copilot**:

- Give a breakdown of the sales by type and channel. Insert a table.
- Project the impact of [variable] and generate a chart to help visualize.
- Model how a change to the growth rate for [variable] would impact my gross margin.

The screenshot displays the Microsoft Excel interface with a sales data table. The table has columns for Country, Customer, Product, Discount Band, Units Sold, Manufacturing Price, Sale Price, Gross Sales, Discounts, Sales, and COGS. The data is organized into rows for various countries and products. The Copilot interface is visible at the top right, showing a search bar and a 'Copilot' button. The status bar at the bottom indicates 'Calculation Mode: Automatic' and 'Workbook Statistics'.

Country	Customer	Product	Discount Band	Units Sold	Manufacturing Price	Sale Price	Gross Sales	Discounts	Sales	COGS

Copilot in PowerPoint

Copilot helps you turn your ideas into stunning presentations.

Some example prompts you can ask **Copilot**:

- Create a five-slide presentation based on a Word document; include relevant stock photos.
- Consolidate this presentation into a three-slide summary.
- Reformat these three bullets into three columns, each with a picture.

Stock Images: Create with Copilot Icons Cutout people Stickers Videos Illustrations

Describe the picture you want to create

 photo of a teddy in times square

Add original art to your presentation with AI

AI generated content lets you easily create custom images and illustrations from a text description

Unleash creativity | Unlock productivity | Uplevel skills

Copilot in Outlook

Copilot works with you in cleaning your inbox and messages.

Some example prompts you can ask **Copilot**:

- Summarize the emails I missed while I was out. Flag important items.
- Draft a response thanking them and asking for more details; shorten this draft and make the tone professional.
- Invite everyone to a “lunch and learn” about new product launches next Thursday at noon

Unleash creativity | Unlock productivity | Uplevel skills

Copilot in Teams

Copilot helps you run effective meetings, get up to speed, organize key discussion points, and summarize actions.

Some example prompts you can ask **Copilot**:

- Summarize what I've missed in the meeting.
- Create a table of pros and cons for [topic].
- What decisions were made, and what are some suggested next steps?

Teams Premium: Intelligent Meeting Recap

H2 2023

EN Ano

CZ 3. vlna

The screenshot displays the Microsoft Teams Premium interface during a meeting recap session. The top navigation bar includes a search bar and a 'Close' button. The main header shows the meeting title 'Sales Analysis Review' with tabs for Chat, Files, Details, and Recap. Below this, a date and time selector shows 'Jan 21, 10:30 AM' and an 'Open in Stream' button.

The central video area features a grid of six participants: Serena Davis, Aadi Kapoor, Ray Tanaka, Danielle Booker, Charlotte de Crum, and Krystal Manning. A progress bar at the bottom of the video grid indicates the current position at 11:23 / 1:48:42.

On the right side, the 'Meeting content' section lists three documents: 'Sales report Q4...', 'Capacity stats list...', and 'VanArsdelPitchDe...'. Below this, a row of tabs includes 'Notes', 'AI Notes' (which is selected), '@ Mentions', 'Transcript', and 'Chat'. A section titled 'Your personal AI suggested notes and tasks' includes a 'Share to Notes' button.

The 'Suggested notes' section lists three items with timestamps:

- Serena** wants to look at the sales report before she and **Beth** spend more budget on the campaign. (5:00)
- Beth** explains that they are on track for new product release in December. But they will need to keep an eye on advertisement budget. She will follow up on that. (5:05)
- Beth** explains that they are managing the capacity well. They could be a problem if they get more popular. **Babak** is going to double check on that. (5:34)

The 'Suggested tasks' section lists two items:

- Beth will follow up on advertisement budget.
- Jon Shammass** will double check with **Amanda** regarding the ETA for the release of the new product.

At the bottom, a 'Speakers' section shows a timeline for three participants: Mona Kane, Babak Shammass, and Daniela Mandra, with colored bars indicating their speaking periods.

MI

Act as a virtual assistant for a content creator. Your boss is about to be out of the office for a trip to the Bahamas. Write an OOO email for your boss that is lighthearted and concise with a witty subject line. Give instructions about whom to contact instead.

Subject: See You Later, Alligator! 🐊

Hi there!

Thank you for reaching out! I am currently out of the office and basking in the sun (and rum) on a trip to the Bahamas. Don't worry, I left the laptop behind, so there will be no working during this vacation.

If you need assistance during my absence, please reach out to my colleague [Name] at [Email]. They will be happy to assist you with anything you need.

Thank you for your understanding, and I'll see you soon!

Best regards,

Microsoft Security Copilot

**Analyze incident** | 583909: OneNote initial access alert da654601065406

12:34 PM

This alert indicates that a device belonging to **Devon Torres**, a user of the **contoso.com** domain, was targeted by an emerging, financially motivated activity group that uses OneNote attachments to deliver remote access malware. The alert provides details about the suspicious process (**ONENOTE.EXE**) that was launched from a downloaded file (**SalesLeads (1).onepkg**) and its parent process (**explorer.exe**), as well as the device's hostname (**workstation8**), OS version (Windows 21H2), and **risk score (High)**. The alert also shows the device's last seen time, external and internal IP addresses, and antivirus status. The device has a user-defined tag (ContosoDemo) and is onboarded to Microsoft Defender for Endpoint (MDATP).

is a link to a OneNote file named SalesLeadsUpdate.one that was **uploaded by Ellis Turner** a user in our enterprise, to his personal OneDrive for Business account.

The file was downloaded by Ellis Turner from different devices and locations, including a Linux device, an Exchange Online server, and two Windows 10 devices in Washington and San Jose. The file was also sent as an attachment in an email with the subject "New Leads Update!" from Ellis Turner to Devon Torres, another user in our enterprise.

Devon Torres clicked on the link from the email and launched his browser to open the file on his Windows 8 device named **workstation8.contoso.com**. The process that initiated the browser launch was Outlook.exe,

Alert on compromised account and device on Contoso.com

OneNote WMI PowerShell AMSI Kinsing Muhstic Sabsik Wacatac

Summary Pinned items (5)

Alert Summary

This alert indicates that a device belonging to Devon Torres, a user of the contoso.com domain, was targeted by an emerging, financially motivated activity group that uses OneNote attachments to deliver remote access malware. The alert provides details about the suspicious process (ONENOTE.EXE) that was launched from a downloaded file (SalesLeads (1).onepkg) and its parent process (explorer.exe), as well as the device's hostname (workstation8), OS version (Windows 21H2), and risk score (High). The alert also shows the device's last seen time, external and internal IP addresses, and antivirus status. The device has a user-defined tag (ContosoDemo) and is onboarded to Microsoft Defender for Endpoint (MDATP).

Attack Steps

The account dtorres@contoso.com was involved in a series of suspicious actions on the workstation8 host, indicating a possible compromise by a malware campaign.

The following attack steps were observed:

- Malicious OneNote package file downloaded
- Malicious scripts executed via WScript.exe
- Attempted AMSI tampering and process injection
- Suspicious Microsoft Defender Antivirus exclusion and startup folder addition
- Suspicious LDAP query and process discovery
- Suspicious WMI process creation
- Suspicious PowerShell command line and script execution

Attack Details

Malicious OneNote package file downloaded

Create a single PowerPoint slide outlining the incident and the attack chain.

12:52 PM

The following PowerPoint was generated for you. Verify its content before sharing or pinning to your investigation.

Ransomware Attack Investigation and Response

Summary

A ransomware attack encrypted files on several devices and demanded payment in Bitcoin.

The attack originated from a phishing email that compromised a user account and downloaded a malicious PowerShell script.

The script used a rogue GPO to disable Windows Defender and spread the ransomware to other devices, including a domain controller.

The SOC analyst used Sentinel and Defender for Endpoint to investigate and contain the attack, and restore the files from cloud backups.

Attack chain

```
graph LR; A[Phishing email] --> B[Compromised User]; B --> C[Powercat]; C --> D[Rogue GPO]; C --> E[Domain controller]; D --> F[Disabled Windows Defender]; E --> F; F --> G[Ransomware encryption]; G --> H[Payment demand];

(i) repair or replace such Goods (or the defective part) or (ii) credit or refund the price of such Goods at the pro-rata contract rate provided that, if Seller so requests, Buyer shall, at Seller's expense, return such Goods to Seller.

(g) THE REMEDIES SET FORTH IN SECTION 10(f) SHALL BE THE BUYER'S SOLE AND EXCLUSIVE REMEDY AND SELLER'S ENTIRE LIABILITY FOR ANY BREACH OF THE LIMITED WARRANTY SET FORTH IN SECTION

10. Limitation of Liability.

(a) EXCEPT FOR OBLIGATIONS TO MAKE PAYMENT UNDER THIS AGREEMENT, IN NO EVENT SHALL EITHER PARTY BE LIABLE UNDER THIS AGREEMENT TO THE OTHER PARTY FOR CONSEQUENTIAL, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, PUNITIVE OR ENHANCED DAMAGES ARISING OUT OF, RELATING TO, OR IN CONNECTION WITH ANY BREACH OF THIS AGREEMENT, REGARDLESS OF (A) WHETHER SUCH DAMAGES WERE FORESEEABLE, (B) WHETHER OR NOT IT WAS ADVISED OF THE POSSIBILITY OF SUCH DAMAGES AND (C) THE LEGAL OR EQUITABLE THEORY (CONTRACT, TORT, OR OTHERWISE) UPON WHICH THE CLAIM IS BASED.

(b) IN NO EVENT SHALL SELLER'S AGGREGATE LIABILITY ARISING OUT OF OR RELATED TO THIS AGREEMENT, WHETHER ARISING OUT OF OR RELATED TO BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE, EXCEED FIVE TIMES THE TOTAL OF THE AMOUNTS PAID TO SELLER FOR THE GOODS SOLD HEREUNDER.

The screenshot displays the Azure OpenAI Service chat interface. At the top, a dark header bar contains the text "GPT + Enterprise data | Demo" on the left, and "Chat Ask a question" with a speech bubble icon in the center. On the right side of the header is the text "Azure OpenAI + Cognitive Search". Below the header, in the top right corner, is a "Settings" link with a gear icon. The main chat area shows a conversation. The first user message is "Does my plan cover annual eye exams?". The assistant's response is: "According to ¹, Northwind Health Plus offers coverage for vision exams, glasses, and contact lenses. Northwind Standard only offers coverage for vision exams and glasses." Below this response is a citation: "Citations: 1. Benefit_Options-2.pdf". The second user message is "I have the plus plan". The assistant's response is: "If you have the Northwind Health Plus plan, ¹ states that you have coverage for vision exams, glasses, and contact lenses." Below this response is another citation: "Citations: 1. Benefit_Options-2.pdf". At the bottom of the interface is a text input field with the placeholder text "Type a new question (e.g. does my plan cover annual eye exams?)" and a blue arrow button to the right.

Point-and-Click AI solutions

Add intelligence to your business

Binary classification

Predict yes/no business outcomes based on historical data patterns with historical outcomes.

Examples

- Will this customer churn (yes/no)?
- Which loan risk profile for this customer (low/high)

Form processing

Digitize your Forms to extract information, store or process them

Examples

- Extract tax form information from PDF files
- Extract invoice information from camera

Object detection

Identify, count and locate objects in images

Examples

- Retail: product inventory detection from smartphone camera
- Manufacturing: recognize parts of a machine

Text classification

Automate text tagging to improve processes and extract untapped value from your data

Examples

- Classify product feedback from customers
- Route customer requests

Business card reader

Pre-trained AI template to extract contact information from camera

Example

- Automate lead gathering during trade events
